Senior Pets:

Our pets age much faster than we do... sometimes there can be an underlying issue that we cannot discover on physical examination alone. The lab offers a great deal for Senior pets. We can run a full CBC, 25 point chemistry, thyroid, urinalysis and fecal check.

Would you be interested in this testing today? _____

Any change in your pet's everyday activities? (Movement, sleeping, ambulation, etc.) _____

If so, what types of changes have you noticed?

Do you have any concern about their comfort level? _____

We offer a great assortment of treatment options for the comfort of our patients! Would you be interested in learning more about any of the following:
